- **GPA: 3.68/4.0**
- **Honors:** Highest Merit Scholarship, Dean's List
- **Relevant Coursework**: Computer Science I, Object Oriented Programming, Data Comm. Tech I, Database Administration, Computer for Engineering Tech, 3D Modeling, Web Development, Cybersecurity IDP, Operating Systems, Advanced Networking, Big Data & Cloud Computing, Database and Data Management

CERTIFICATIONS, SKILLS & PROJECTS

- **Certifications:** Amazon Web Services - *Cloud Practitioner Certification*   **May, 2023**
- **Skills:** Python, HTML, CSS, Java, SQL, Cisco Packet Tracer, FileZilla, WireShark, AWS (Amazon Web Services),
- **Leadership:** *Vice President* of Computer Science Club, *Member* of National Residence Hall Honorary, *Member* of Association of Information Technology Professionals, *Member* of EIU E-Sports.
- **Projects**:
  - **EIU Tutoring Website (HTML, CSS, JAVASCRIPT)**
    - Wrote a template Tutoring Website for EIU Student Success Center using EIU's style sheet
    - EIU Student Success Center did not have a formal website and is now putting one in place because of my template website page. (This is not a full page; it was an outline website)
    - **Link**: https://pen.eiu.edu/kjcoleman3/finalproj/mainpage.html
    - ***(Disclaimer, I used EIU's styling sheet and wrote the main content for the pages, I did not create the entire content of the site, just the tutoring pages as well as the pages linked on the left of the main page)***
  - **My Personal Website (HTML, CSS, JAVASCRIPT)**
    - Created a personal website portfolio that displays all my portfolio information. Written and designed by myself from scratch.
    - Modern and sleek design which represents who I am as a developer and IT leader.
    - Completely responsive using Bootstrap 5
    - Hosted on Amazon AWS using S3 and Route 53.
    - **Link**: http://kalebcoleman.click/
  - **Banking Webapp (HTML, CSS, SQL, PHP, JAVASCRIPT)**
    - Created a mockup banking webapp which has a login, loan application, money transfer feature and an administration user's management page.
    - Used majestic dashboard template for styling.
    - Had full backend database using SQL.
    - Uses many different types of queries and functions including report queries.
    - Link: https://github.com/Nerdfew/SimpleBankingWebApp
  - **Godlovesonline Website (HTML, CSS, SQL, PHP)**
    - This was a site I developed with senior developers at my internship for one of our clients.
    - This site was created using HTML, CSS, PHP and some backend SQL as well as the proprietary content management system that our company uses.
    - This project taught me a lot about workflow, web development and implementation of client's needs.
